ABSTRACT

15 **Use of mono- or di-esters of cinnamic acid or of one of its derivatives
and vitamin C, as donor of NO.**

 The present invention relates to the use of mono- or di-esters of cinnamic acid
or of one of its derivatives and vitamin C, in particular ascorbyl 2-O-cinnamate, to
20 increase the production of nitric oxide in or on the skin or scalp or the mucous
membranes as well as a procedure of application of nitric oxide in or on the skin, the
scalp or the mucous membranes. It also relates to a cosmetic treatment procedure
which makes use of these compounds as donors of NO.
